

“We have raised our seed round from the ONGC startup fund which has guided the growth of our venture from early traction to expansion in five states of India. We are also hoping to onboard ONGC as a customer in future which will accelerate our growth exponentially “

**Himmat Singh, Founder & CEO**

## Company Profile

Phatom Technologies is a robotic cleantech company providing robotic waterless cleaning system for solar PV panels. At present our products are installed in 950+ MW of solar plant capacity across India.
