

Planys Technologies

“Mr. Tanuj Jhunjhunwala, Chief Executive Officer – Planys

ONGC's startup fund's support played a pivotal role in getting a product-market-fit for Planys' underwater inspection technology. We are deeply grateful for their invaluable support and partnership, which continues to drive our success today.

“Mr. Vineet Upadhyay, Chief Technology Officer – Planys

With ONGC's backing, we were able to invest in research, development, and scaling our operations, propelling us from a promising idea to a globally recognized brand in the field of marine robotics.

Planys Technologies Pvt Ltd is a pioneer in the field of marine robotics providing submersible inspection solutions. With office in Chennai, Netherlands, and Saudi Arabia, Planys has today completed 400+ projects worldwide with 16000+ hours of underwater operation. Planys also develops customized robotics solutions and components for special applications including magnetic crawlers for ship hull cleaning and non-destructive testing, and autonomous underwater vehicles for coastal survey. Planys has demonstrated strong design and engineering capabilities including computational fluid dynamics, thermal optimization, power and battery systems, guidance, control, and autonomy systems, with more than 85% indigenous content in its products.
